Smart-UPS On-Line

1-20 kVA

High-density, double-conversion online power protection with scalable runtime

A versatile UPS developed for unstable power conditions worldwide.

Smart-UPS[™] On-Line provides high-density, true double-conversion online power protection for servers, voice/data networks, medical labs, and light industrial applications. Capable of supporting loads from 1 to 20 kVA in a rack/tower convertible form, the Smart-UPS On-Line is available from 2 U to 12 U. The 15 kVA and 20 kVA models enable support of power-hungry blade servers or heavily loaded equipment racks. When business-critical systems require runtime in hours, not minutes, Smart-UPS On-Line can be configured with matching battery packs to comply with aggressive runtime demands. The included PowerChute[™] management software provides unattended graceful shutdown of network operating systems. All models 5 kVA and above include an integrated network management card for remote management (optional on models below 5 kVA). The entire Smart-UPS On-Line family provides value to customers with demanding power conditions, including a very wide input voltage window, extremely tight output voltage regulation, frequency regulation, internal bypass, and input power factor correction.

Features and benefits

Rack/tower convertible

Ensures integration in various environments

A Hot-swappable/user-replaceable batteries

Ensures continuous operation of the load even when the batteries are being replaced

Double-conversion online

Provides tight voltage and frequency regulation and zero transfer time for reactive loads (machinery, lab equipment, etc.)

Advanced 16-segment LED display

Quickly understand unit and power status with visual indicators (LCD on 15 – 20 kVA models)

Frequency and voltage regulation

Gives higher application availability by correcting poor frequency and voltage conditions without using the battery

0

UPS Network Management Card with Environmental Monitoring

Provides remote user interface, managed via web browser, SNMP, and Telnet. Includes graceful unattended shutdown. The UPS Network Management Card is pre-installed on UPS models 5 kVA through 20 kVA

2 Serial connectivity

Enables quick and easy configuration of the UPS

(4)

Scalable runtime

Allows additional runtime to be quickly added as needed

Built-in automatic and manual bypass

Ensures seamless power to the load even in the event of catastrophic UPS failure

5 Field-replaceable power distribution panels

Enables quick in-field modification of output receptacles to fit changing needs

Product accessories

Management cards

AP9610: Relay I/O SmartSlot[™] Card (not compatible with SURTD UPS models)

AP9622: Modbus[®]/Jbus Interface Card (not compatible with SURTD UPS models)

AP9630: UPS Network Management Card

AP9631: UPS Network Management Card with Environmental Monitoring

AP9810: APC[™] by Schneider Electric[™] Dry Contact I/O Accessory (not compatible with SURTD UPS models)

AP9620: Legacy Communications SmartSlot Card (compatible with SURTD UPS models only)

A comprehensive portfolio of services

Schneider Electric Critical Power & Cooling Services (CPCS) provides the expertise, services, and support you need for your building, industry, power, or data center infrastructure. Our world-class life cycle services offer a smart way to install and maintain your critical applications, ensuring your systems are always running at peak performance.
